Mobileye develops systems that change the way we drive, from preventing accidents (advanced driver assistance systems) to semi and fully autonomous vehicles. If you are an excellent, bright, hands on person with a passion to make a difference - come and lead the revolution!

Mobileye field engineer is the connecting link between Mobileye and its customers, the car manufacturer (OEM) and the integration partner (Tier 1). As such, the field engineer provides the first line of technical support, analysis and integration in the development of next generation semi-autonomous driving systems.

What will YOU do?
The field engineer will relocate abroad and work alongside the development teams of a leading international automotive company. The field engineer will hold a key role in Mobileye's development projects providing the customer with direct technical support. As such, the field engineer will have influence on the design and application of advanced vision based semi-autonomous driving systems, eventually installed in millions of cars worldwide.

The day-to-day tasks include various activities within development process, such as:

- Installing various Mobileye systems on evaluation and development vehicles.
- Performing and supervising test drives on open road and test tracks.
- Testing performance and quality of the vision system.
- Supporting system integration efforts with deep "bits and bytes" understanding of the entire system.
- Providing expert support and training for the engineering teams on site.
- The position includes office work, support at vehicle production lines and integration facilities.
- Tasks also include long test drives and travel to additional countries.

**The position requires a training period of 4-6 months in Mobileye Jerusalem**

Possible relocation options:

- Japan
- Korea
- China

Desired Background

- Willingness to relocate abroad for a significant period (minimum of 1.5-2 years)
- Academic credentials: Degree in a scientific field or engineering
- Valid driving license
- Fluent English, additional language is an advantage
- Background in hardware or software development - advantage
- Foreign Citizenship - advantage
